Consolidated financial information is established in compliance with the IFRS (International Financial Reporting Standards) reference, as adopted by the European Union on September 30, 2016.

The activity of the company Genica Research (United States, Vegetable seeds), acquired in February 2016, has not been restated for the impact of scope for fiscal year 2016-2017, since the American activities of the company have been integrated into HM.CLAUSE and its European activities into Vilmorin-MKS, both Vegetable seeds Business Units.

AN EXTREMELY DYNAMIC FIRST QUARTER FOR 2016-2017, WITH STRONG PROGRESSION BOTH FOR THE VEGETABLE SEEDS AND FIELD SEEDS ACTIVITIES

- VEGETABLE SEEDS DIVISION:
AN EXCELLENT FIRST QUARTER,
FOLLOWING ON FROM THE PREVIOUS FISCAL YEAR**

Sales for the Vegetable seeds division came to 138.2 million Euros, an increase of 13.3% compared to the same period in the previous fiscal year. Restated for the impact of currency translation, this increase was 12.3%.

During the course of the first quarter, the Vegetable seeds division once again accomplished a commercial performance of the highest quality. Growth in business, the level of which is promising for the three Business Units: HM.CLAUSE, Hazera and Vilmorin-MKS, was achieved in all the geographical zones. The progression was particularly marked in certain key territories, especially in North America and Latin America. Asia also posted a very significant increase in business, with sustained development in China, in particular for carrot, and in India.

At the beginning of this fiscal year, all the strategic crops progressed well, with remarkable performances for carrot, tomato, watermelon, pepper and bean in particular. The Vegetable seeds activity gained more market shares, fully benefitting from the global dynamic market.

FIELD SEEDS DIVISION:

A HIGH QUALITY START TO THE FISCAL YEAR, DRIVEN BY A VERY GOOD PERFORMANCE IN SOUTH AMERICA

Sales for the Field seeds division for the first quarter came to 85.4 million Euros up 7.5% with current data and 11% on a like-for like basis.

- In Europe, the commercial campaign for rapeseed this year resulted in an important surge in business, benefitting from a positive market trend, as hybrid seeds continued to be adopted. This progression was particularly marked in Central Europe and Germany, where market share gains were significant. Vilmorin & Cie is thus confirming its position as a top-rate European player. The first part of the commercial campaign for straw cereals seeds (wheat and barley) showed a sharp drop in sales, in a market affected by the reduction in the use of certified seeds, particularly in France, and in spite of the fine performances in certain Central European countries. As for the previous fiscal year, sales of forage seeds and amenity grasses slipped. Sales for this product line that completes the commercial line-up in Europe, fell back particularly in France in a difficult environment for agricultural markets.
- In South America, the first corn campaign in Brazil (*safrá*) posted very strong progression, both in volume and in value, in a context of significant increases in cultivated acreage for this crop. Order books for the second corn campaign (*safrinha*) are also looking good.
- For the coming commercial spring campaign, procurement of corn seeds is nearly complete, both in Europe and North America, and according to the latest estimates, is globally in line with production plans objectives.

OUTLOOK FOR 2016-2017: CONFIRMATION OF OBJECTIVES FOR DYNAMIC BUSINESS GROWTH AND CONSOLIDATION OF THE CURRENT OPERATING MARGIN

Sales for the first quarter in recent years have represented on average almost 15% of sales for the year.

Fiscal year 2016-2017 should continue to be affected by the temporary pressure on agricultural prices, and marked by the consolidation operations currently taking place in the agrochemicals sector.

In this context, and on the basis of business figures at the end of this first quarter, Vilmorin & Cie can confirm its objectives in terms of sales and current operating margin for fiscal year 2016-2017. These objectives correspond to an increase in consolidated sales of 5% on a like-for-like basis, and a current operating margin rate at the same level as in 2015-2016, including gross research investment of more than 240 million Euros.
